DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 12, 2004 has been entered.
2. This Office action is in response to the amendment filed August 12, 2004 in which claims 46, 48, 52, 57, 63, 66, 76, 80, 84 and 90 were amended and claims 65, 75 and 92 were canceled.
3. The rejections of the claims under 35 USC 112, first and second paragraphs are withdrawn in view of the amendment to the claims and Applicant's arguments.
4. The rejection of the claims under 35 USC 102(b) is withdrawn in view of the amendment to the claims.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 39-42, 47-50 and 53-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kirk (US 5,023,095).

Kirk teaches a composition comprising beta-carotene, at least one edible oil and dl-alpha-tocopherol (see abstract; col. 2, lines 17-24). The edible oil may be selected from coconut, palm, olive, peanut (a member of the *Leguminosae* family), and corn (grain). Kirk teaches that the oils may be used in combination (see col. 3, lines 22-28). Kirk also teaches that dl-alpha-tocopherol is an antioxidant (see col. 3, lines 47-50). Kirk teaches the limitations of the claims other than the differences that are discussed below.

In the first aspect, Kirk differs from the claims in that she does not specifically teach applicant's intended use. However, intended use is given no patentable weight in claims that are directed to the composition per se.

In the second aspect, Kirk differs from the claims in that she does not teach that the edible oils function as thermal stabilizers. However, given that Kirk teaches some of the same oils as applicant in combination with beta-carotene, it would be reasonable to expect that the oils would function in this capacity. Furthermore, a compound and its properties are inseparable. In re Papesch, 137 USPQ 43 (CCPA 1963).

7. Claims 43-46, 51, 52, 55 and 56 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 57-64, 66-74 and 76-91 are allowed. The prior art fails to teach or suggest the claimed fuel additive and fuel compositions containing said additive.
